

DIGITAL STORYTELLING for BIPOLAR DISORDER

Evaluating digital storytelling to support the illness experience of patients and families living with bipolar disorder

WHO:

Canadian and international mental healthcare providers (psychiatrists and allied mental health providers) with expertise in bipolar disorder

ABOUT THE STUDY:

- We are inviting you to participate in a survey for a research study
- This study looks at if patients diagnosed with bipolar disorder gain emotional benefit from digital storytelling that portrays the lived experience of bipolar disorder
- Digital storytelling is a creative arts process that captures personal narratives using cinematic techniques producing brief video clips
- If you agree to participate in the study, you will be asked to complete a short 10-minute online survey

To complete survey, please visit:
pbrisb.limequery.com/OOD_Survey_Providers

STUDY CONTACTS:

- Research Associate: Sandalia Genus, PhD
sandalia.genus@sunnybrook.ca
Tel: 416-480-6100 ext. 63529
- Investigator: Dr. Ari Zaretsky, MD
ari.zaretsky@sunnybrook.ca
Tel: 416-480-5031

FOR YOUR PARTICIPATION, YOU WILL BE ENTERED TO WIN A DRAW FOR A \$250 GIFT CARD
